

Getting FREE NARCAN NASAL SPRAY for Georgia High Schools, Colleges, Universities, and Public Libraries

Schools (all grade levels), Public libraries, Universities, and YMCAs may obtain free Narcan Nasal Spray through Emergent BioSolutions, Inc in partnership with Direct Relief.

Directions: E-mail EmergentGives@ebsi.com to request naloxone for your school / public library / university / YMCA.

You do not have to visit a physician to get their prescriber's license #, name, and signature. There is a letter of authorization (LOA) on file at Emergent BioSolutions, Inc which Georgia Overdose Prevention requested Dr. Shonali Saha to write that does that! You may want to mention the LOA already on file when you email EmergentGives@ebsi.com with your naloxone request.

Georgia Overdose Prevention does not supply schools, healthcare providers, law enforcement or first responders with naloxone. Our grant specifies that we provide our kits to laypeople at highest risk of overdose (active users of street drugs, people on prescription opioids, people in recovery, sex workers, people recently released from incarceration/detox/rehab), especially those who are uninsured or underinsured. We also equip loved ones of those at-risk groups listed above who are in frequent close proximity to the at-risk person and could intervene if an overdose occurs.
